

CONTROLOMATIC

ChlorMaker

SP-201-01

Baseline spa saltwater chlorine generator

SmarterSpa & SmarterSpa+

SP-401-01 & SP-450-01

Spa saltwater chlorine generator with built-in chlorine detection and optional mobile app

MegaChlor & MegaChlor-CD

SP-301-01 & SP-302-01

Pool and swim spa saltwater chlorine generator with optional chlorine detection technology

Overview

The ChlorMaker, SmarterSpa, and SmarterSpa+ are saltwater systems uniquely designed for hot tubs and spas, bringing the same water quality and maintenance reduction benefits that pool owners have enjoyed for years. Turn your hot tub water into salt water by adding salt (about a teaspoon per gallon), and then let our chlorine generators take care of your sanitation needs day after day.

The MegaChlor and MegaChlor-CD saltwater systems are similarly designed for larger bodies of water, e.g. swimming pools and swim spas.

Standard Features in All Models

- No spa modifications required, and the spa does not need to be turned on
- Adjustable Time-Based Power Levels: built-in ability to control chlorine generation
- Easy-To-Use Control Box: 3 buttons and 4 lights for operation; conveniently mounts to the spa's skirt
- Boost Mode: chlorine boost after spa use
- Salt Level Indication: lets you know when to add salt to maintain or boost chlorine production
- High Current Shutdown: to protect the power supply and titanium plates if there is too much salt drawing current
- Automatic Cleaning: the low voltage across the titanium plates in the electrode reverses periodically, to clean and reduce calcium buildup
- Cell simply drapes over the side of the spa into the water (in-line kit available)
- Cell Lifespan: 7,000 hours of chlorine generation
- Support for both 110 and 220 VAC supply voltage

ChlorMaker

- For spas up to 1,000 gallons (3,800 liters)
- Pure chlorination of up to 30 grams per day
- Vacation Mode: lowers the output when inactive for two weeks

ChlorMaker is a semi-automated, saltwater chlorine generation system specifically designed for spas up to 1,000 gallons. ChlorMaker generates chlorine from a small amount of ordinary salt (Sodium Chloride, NaCl) dissolved in the spa water.

SmarterSpa & SmarterSpa+

- **Optional App (SmarterSpa+)**
 - [Link to download now](#)
- Built-In Chlorine Detection Technology: will not overchlorinate your spa
- For spas up to 1,000 gallons (3,800 liters)
- Pure chlorination of up to 30 grams per day

SmarterSpa is the only saltwater chlorine generator with chlorine detection built into the cell: SmarterSpa knows when to turn on, and when it does it will be on for a fixed amount of time. When it turns off, it will be off until it needs to turn on again, based on the chlorine measurement, eliminating the guesswork.

MegaChlor & MegaChlor-CD

- **Optional Chlorine Detection Electrode (MegaChlor-CD)**
- For pools up to 17,000 gallons (64,000 liters)
- 2,000 to 4,000 PPM salt concentration
- Pure chlorination of up to 0.25 pounds (115 grams) per day

MegaChlor is a semi-automated, saltwater chlorine generation system specifically designed for pools and swim spas up to 17,000 gallons. To generate for larger bodies of water, MegaChlor uses a 60W power supply, allowing it to produce more chlorine from higher salt concentrations.
